

CENTER FOR
ADVANCED EYE CARE

**OCULOPLASTIC &
RECONSTRUCTIVE
SURGERY**

OUR EYES SAY SO MUCH ABOUT US.

They reveal what we think, and they express what we feel. Sometimes, our eyes do not convey the full range of human thoughts and emotions because of heredity or the aging process.

WHAT IS OCULOPLASTIC SURGERY?

Oculoplastics, also known as ophthalmic plastic surgery, includes several cosmetic and reconstructive surgical techniques used to treat the eyelids, tear ducts, face, and eye sockets. While the primary purpose of most of these treatments is to improve vision and ocular health, many can provide an aesthetic enhancement as well.

WHY CHOOSE CENTER FOR ADVANCED EYE CARE?

At the Center for Advanced Eye Care, we are committed to providing the utmost quality for patients requiring surgical and medical care for their vision conditions. If you seek an oculoplastic procedure, regardless if it's for cosmetic or functional reasons, you want to be highly selective. The Center for Advanced Eye Care is dedicated to offering the best oculoplastic and reconstructive services in Delaware. We utilize the most advanced diagnostic and treatment technologies and are very experienced with the latest techniques.

Oculoplastic surgery is a blend of science and art.

and cosmetic results. — Dr. Blair Armstrong

TESTIMONIAL

I was unable to see and read clearly due to my droopy eyelids. Dr. Blair Armstrong performed Bilateral Upper Eyelid Ptosis Repair and the outcome has been fantastic. I can clearly see and no longer have issues with my eyes. Dr. Armstrong was professional and so were the staff.

I highly recommend Dr. Blair Armstrong and Center for Advanced Eye Care! — V.G.
